

Subject Index to Volume 14

A

- Acetoacetate, ketone body kinetics, determination by dual-isotope technique, E185
- Acetylcholine, potentiation between ATP or ADP, insulin secretion and, E416
- ACTH: *see* Adrenocorticotropin
- Adenosine diphosphate, potentiating synergism between acetylcholine, insulin secretion and, E416
- Adenosine monophosphate, cyclic adenylate cyclase toxin effects, pituitary, E164
- coordinate regulation, zinc metabolism, E688
- production by parathyroid hormone, visceral yolk sac, E27
- renin release, calcium effects, renal, E98
- Adenosine triphosphate, potentiating synergism between acetylcholine, insulin secretion and, E416
- Adenylate cyclase, bacterial, pituitary and, E164
- Adipocytes
- glycogen synthase and pyruvate dehydrogenase in, obesity and diabetes, E489
- insulin action, diet change effects, E616
- insulin sensitivity, glucose tolerance effects, E306
- Adipose tissue
- brown: *see* Brown fat
- endotoxin-treated, lipoprotein lipase-suppressing mediator in, E470
- exercise trained and cold acclimated, lipoprotein lipase in, E251
- fat feeding, insulin resistance and, E576
- ADP: *see* Adenosine diphosphate
- Adrenalectomy
- alanine effects, cold-exposed liver, E385
- bilateral, purine biosynthesis after, liver, E373
- Adrenal medulla, catecholamines, after brain stem stimulation, E14
- β -Adrenergic agonists
- luteinizing hormone release and, orchidectomy, E316
- plasma renin activity and, awake state, E695
- Adrenocorticotropin, angiotensin II stimulation of secretion, vasopressin in, awake state, E52
- Aging, low-protein diet, thermogenic response to, E438
- Alanine, malate-aspartate shuttle, cold-exposed liver, E385
- Amenorrhea, energy deprivation effects, sex hormone patterns, E483
- Amidophosphoribosyltransferase, content, adrenalectomized liver, E373
- Amino acids
- branched-chain, glucose utilization and, E648
- leucine oxidation, trioctanoin infusion effects, E343
- metabolism, starvation and intravenous refeeding, E604
- protein degradation and, skeletal muscle, E379
- transport, exercise and insulin effects, muscle, E21
- tyrosine uptake and, retina, E393
- uptake, muscle cells, E611
- α -Aminobutyric acid, uptake, exercise and insulin effects, muscle, E21
- α -Aminoisobutyric acid, insulin sensitivity, muscle, after exercise, E664
- Angiotensin II
- receptors: *see* Receptors
- stimulation of ACTH secretion, vasopressin role in, awake state, E52
- Anovulation, energy deprivation effects, sex hormone patterns, E483
- ATP: *see* Adenosine triphosphate
- Autonomic nervous system, vasopressin mediation, γ -MSH, E134
- Autophosphorylation, kinase activity and, insulin receptor, diabetes, E542
- Awake state
- ACTH secretion, angiotensin II stimulation of, vasopressin role in, E52
- plasma renin activity, α -adrenoceptor agonists, E695
- substrate balance, hindlimb, pregnancy and, E42
- vasopressin release, central cholinergic control of, E146
- vesicle encapsulated insulin, charge effects, liver, E591

B

- Basolateral membrane, renal, insulinlike growth factor in, E32
- Bethanechol, pancreatic polypeptides and, E111
- Bile, copper turnover and excretion, measurement with ^{67}Cu , E551
- Biliary duct, ligation, copper turnover, E551
- Blood-brain barrier
- carrier-mediated transport, enkephalins and *N*-Tyr-MIF-1, E477
- corticosterone transport, CBG effects, E204
- tyrosine uptake, amino acid effects, E393
- Blood flow
- insulin action and, muscle, E422
- leg, glucose uptake during exercise, E65
- nerve, edema and, E92
- pancreatic islet, glucose-induced changes, central nervous system, E644
- renal, plasma renin activity, awake state, E695
- uterus, PHI and VIP, smooth muscle, E48
- Blood pressure
- ACTH release, angiotensin II, vasopressin role in, awake state, E52
- cholinergic control, central, awake state, E146
- oxytocin neuron activity, modulation by vasopressin, E556
- pressor effects of γ -MSH, vasopressin and, E134
- Blood-retinal barrier, tyrosine uptake, amino acid effects, E393

- Blood volume, hemorrhage effects, vasopressin response to (sheep), E464
- Body, composition, sex hormone patterns and, menstruating women, E483
- Bone, changes, pregnancy and lactation, E400
- Bornaprolol, luteinizing hormone release and, orchidectomy, E316
- Bradykinin, activity, ovarian increase in, E362
- Brain
- glucose transport, chronic hypoglycemia effects, E442
- tyrosine uptake, amino acids and, E393
- Brain stem, stimulation, catecholamines after, E14
- Breathing: *see* Respiration
- Brown fat
- exercise trained and cold acclimated, lipoprotein lipase in, E251
- fat feeding, insulin resistance and, E576
- iodothyronine 5'-deiodinase, hormonal regulation of, E639
- mitochondria, guanosine diphosphate binding sites, E192
- nuclear triiodothyronine receptors, E503
- thermogenesis
- glutamate treatment and, E407
- low protein and, aging effects, E438
- thyroxine in
- diet and cold effects, E1
- myopathy and, E8

C

- Calcium
- absorption, chronic DOCA treatment and, E279
- pump: *see* Pump
- renin release and, renal, E98
- serum
- parathyroid hormone and, E680
- skeletal mineralization and, vitamin D deficiency, E234
- transport, thyroid hormone effects, skeletal muscle, E258
- Calibration, radioimmunoassay, variance weighting functions, E357
- Caloric deprivation: *see* Feeding
- Carbohydrates, metabolism, newborn, E71
- Carbonic anhydrase, transport, blood-brain barrier, E477
- Carbon tetrachloride, liver injury, insulin and glucagon secretion after, E660
- Carnitine, synthesis, clofibrate and, liver, E311
- Catecholamines
- disposal, splanchnic and renal contributions to, E285
- early hyperglycemia, after hemorrhage, E597
- exercise, inspired oxygen breathing and, E209
- iodothyronine 5'-deiodinase regulation, brown fat, E639
- oxygen consumption, skeletal muscle and, E294
- peripheral and adrenal, after brain stem stimulation, E14

- Catecholamines (continued)
thyroidectomy effects, newborn (lamb), E151
- CBG: *see* Corticosteroid binding globulin
- Central nervous system
cholinergic agonists, hyperglycemic effects of, fasting and, E431
cholinergic control, vasopressin release, awake state, E146
islet blood flow, glucose-induced changes, E644
lipomobilizing center, preoptic area and, E703
- Cholesterol, metabolism, estrogen-sensitive progestin synthesis and, corpus luteum, E457
- Cholinergic agonists, hyperglycemic effects, central nervous system, E431
- Cholinergic drugs, control of vasopressin release, central, awake state, E146
- Circulation: *see* Blood flow
- Clearance, antigen, into milk, during lactation, E227
- Clofibrate, concentration of carnitine, hepatic, E311
- Clonidine, luteinizing hormone release and, orchidectomy, E316
- Cold
acclimation
lipoprotein lipase and, adipose tissues, E251
nuclear triiodothyronine receptors and, brown fat, E503
diet and, thyroxine in brown fat and, E1
exposure, alanine effects and, liver, E385
thyroxine, myopathic brown fat, E8
- Copper, turnover, measurement with ^{67}Cu , E551
- Corpus luteum, estrogen-sensitive progestin synthesis, cholesterol metabolism and, E457
- Corticosteroid binding globulin, blood-brain barrier corticosterone transport and, E204
- Corticosterone
antishock effects, dextran shock, E569
obesity and, brown fat, E407
purine biosynthesis and, adrenalectomized liver, E373
transport, blood-brain barrier, CBG effects, E204
- Cortisol
altricial and precocial timing of birth, E78
early hyperglycemia, after hemorrhage, E597
release, angiotensin II effects, awake state, E52
- C-peptides
glucose uptake, somatostatin effects, E674
pancreatic, pulsatility of, E215
splanchnic output, inhibition by proinsulin, E139
- Cycloheximide
kinin-generating activity and, ovarian, E362
protein degradation and, skeletal muscle, E379
- Cytomorphometry, skeletal mineralization, vitamin D deficiency and, E234

D

- Dantrolene, calcium transport and, skeletal muscle, E258

- Dehydration, rehydration and, atrial natriuretic factor and vasopressin effects, E497
- Dementia, peptide transport and, blood-brain barrier, E477
- Deoxycorticosterone acetate, chronic treatment with, calcium absorption and, E279
- Deoxyglucose, metabolism, blood flow effects, muscle, E422
- 2-Deoxy-D-glucose, halothane effects, pancreatic F-cell, E111
- Development: *see also* Growth hormones and, E78
- Diabetes
calcium pump activity, sarcoplasmic reticulum, skeletal muscle, E515
glycogen synthase and pyruvate dehydrogenase, fat cells, E489
insulin receptor, autophosphorylation and kinase activity in, E542
vesicle encapsulated insulin, charge effects, liver, E591
- Diabetes mellitus
glutamine transport, liver plasma membrane vesicles, E509
noninsulin-dependent
glucose tolerance and, adipocytes, E306
glucose uptake, somatostatin effects, E674
- Diet: *see* Feeding
- 1,25-Dihydroxyvitamin D cholecalciferol, calcium absorption and, intestinal, E279
- DOCA: *see* Deoxycorticosterone acetate
- Dual-isotope technique, ketone body kinetics, E185

E

- Edema, peripheral nerve, blood flow and, E92
- Endometrial cells, separation method, E630
- Endotoxin, treatment, lipoprotein lipase-suppressing mediator in, E470
- Energy
deprivation, sex hormone patterns and, menstruating women, E483
expenditure
decreased, fat feeding and, E576
enteral nutrition and, E524
- Enkephalins, carrier-mediated transport, blood-brain barrier, E477
- Epinephrine
coordinate regulation, zinc metabolism, E688
disposal, splanchnic and renal contributions to, E285
glucoregulation and, exercise, E104
hyperglycemic effects, central, fasting and, E431
luteinizing hormone release and, orchidectomy E316
- Epithelial cells, uterine, separation from mesenchymal cells, E630
- Ethanol
ingestion, maternal, glucose balance and, E176
malate-aspartate shuttle and, cold-exposed liver, E385
- Euglycemic clamp
insulin action, blood flow effects, muscle, E422
insulin resistance, fat feeding and, E576
insulin sensitivity and, lactation, E537

- Exercise
additive effects, glucose and AIB uptake, muscle, E21
chronic, insulin binding, muscles, E196
dynamic, glucose uptake during, leg, E65
glucoregulation, epinephrine and, E104
insulin resistance and, muscle, obesity, E299
insulin sensitivity and glycogen depletion, muscle, E664
oxygen consumption after, skeletal muscle, E294
training, lipoprotein lipase and, adipose tissue, E251
- Extensor digitorum longus, calcium transport, thyroid hormone effects, E258

F

- Fasting
cholinergic agonists, hyperglycemic effects of, E431
exercise, muscle insulin sensitivity after, E664
intravenous refeeding and, amino acid metabolism, extremities, E604
protein degradation and, skeletal muscle, E379
starvation, nuclear triiodothyronine receptors, brown fat, E503
- Fat, insulin resistance, obesity and, E576
- Fat cells: *see* Adipocytes
- Fatty acids
free, mobilization, preoptic area and, E703
oxidation, sulfonylureas effects, liver, E241
- Feeding
caloric deprivation, thyroid hormone transport and, E156
diet
change, insulin action and, E616
insulin resistance and, obesity, muscle, E299
thyroxine in brown fat and, E1
thyroxine in myopathic brown fat, E8
dietary antigen transfer, during lactation, E227
dietary recovery, rRNA metabolism during, kidney, E266
enteral nutrition, continuous versus single bolus, E524
fat, insulin resistance and, E576
intravenous, fasting and, amino acid metabolism, extremities, E604
low-calorie diet, energy deprivation effects, sex hormone patterns, menstruating women, E483
low-protein diet, thermogenic response to, aging and, E438
low-sodium diet, plasma renin activity, awake state, E695
parenteral nutrition, amino acid metabolism, extremities, E604
protein degradation and, skeletal muscle, E379
- Fetus: *see also* Lactation; Placenta; Pregnancy
continuous hemorrhage, arginine vasopressin response (sheep), E464
growth, insulin stimulation of, E624
hyperglycemic, insulin secretion and, E86
insulin infusion effects, glucose kinetics, mother (sheep), E448
membranes, parathyroid hormone action, E27

metabolic substrate uptake, insulin effects (sheep), E349
 placental lactogen, GH receptors and, liver (sheep), E328
 FFA: *see* Fatty acids, free
 Fructose 6-phosphate, cycle, isotopic assessment, E530

G

Galactose, blood flow and, nerve edema, E92
 Galanin, novel pancreatic neuropeptide, E127
 Gastrocnemius muscle
 glucose and AIB uptake, exercise and insulin effects, E21
 insulin sensitivity, exercise and, E664
 GDP: *see* Guanosine diphosphate
 GH: *see* Growth hormone
 Glucagon
 altricial and precocial timing of birth, E78
 coordinate regulation, zinc metabolism, E688
 early hyperglycemia, after hemorrhage, E597
 epinephrine and, exercise, E104
 galanin effects, E127
 iodothyronine 5'-deiodinase regulation, brown fat, E639
 levels, zinc deficiency and, E273
 pulsatility, pancreas, E215
 secretion, carbon tetrachloride-induced liver injury, E660
 Glucocorticoids
 antishock effects, dextran shock, E569
 coordinate regulation, zinc metabolism, E688
 malate-aspartate shuttle, cold-exposed liver, E385
 Gluconeogenesis
 alanine effects, cold-exposed liver, E385
 glucose infusion and, liver, E584
 recycling and oxidation, newborn, E71
 Glucoregulation, epinephrine and, exercise, E104
 Glucose
 appearance, glycogen synthesis and, liver, E584
 balance, maternal and neonatal, ethanol ingestion effects, E178
 hindlimb, pregnancy and, awake state, E42
 insulin secretion and, fetal pancreas, E86
 intolerance, zinc deficiency and, E273
 islet blood flow and, central nervous system, E644
 kinetics, insulin infusion effects, fetal (sheep), E448
 metabolism, blood flow effects, muscle, E422
 oxidation and recycling, newborn, E71
 plasma concentration, liver glycogen synthesis and, E584
 production
 epinephrine and, during exercise, E104
 glucagon-induced, β -adrenergic contribution to, uremia, E322
 insulin sensitivity and, lactation, E537
 splanchnic output, inhibition by proinsulin, E139
 tolerance
 chronic exercise effects, muscle, E196
 insulin sensitivity and, adipocytes, E306
 transport, brain, chronic hypoglycemia effects, E442
 turnover
 exercise in inspired oxygen breathing, E209
 isotopic assessment, E530
 uptake
 dynamic exercise and, leg, E65
 exercise and insulin additive effects, muscle, E21
 insulin-stimulated, somatostatin effects, E674
 muscle, after exercise, E664
 oxygen consumption and, skeletal muscle, E294
 utilization, α -ketoisocaproate and leucine, E648
 Glucose 6-phosphate
 insulin resistance and, obesity, muscle, E299
 uptake, maximal exercise and, leg, E65
 Glutamate, kinetics, E117
 Glutamine
 kinetics, E117
 transport, liver plasma membrane vesicles, E509
 Glyburide, fatty acid oxidation and, liver, E241
 Glycemia, glucoreceptors, insulin-sensitive, E703
 Glycine, purine biosynthesis and, adrenalec-tomized liver, E373
 Glycogen
 depletion, insulin sensitivity and, muscle, after exercise, E664
 liver, maternal ethanol ingestion effects, E178
 metabolism, blood flow effects, muscle, E422
 oxygen consumption and, skeletal muscle, E294
 synthesis, plasma glucose effects, liver, E584
 Glycogen synthase, adipocytes, obesity and diabetes, E489
 Growth: *see also* Development
 insulin stimulation of, fetal paws, E624
 Growth factor, insulinlike, muscle cells, E611
 Growth hormone
 binding and phosphorylation, basolateral membranes, renal, E32
 receptors: *see* Receptors
 Guanosine diphosphate, binding sites, brown fat mitochondria, E192

H

Halothane, pancreatic polypeptides and, E111
 Heart rate
 ACTH release, angiotensin II, vasopressin role in, awake state, E52
 enteral nutrition, continuous versus single bolus, E524
 Hemodialysis, glucagon action, β -blockade and, E322
 Hemorrhage
 early hyperglycemia after, hormonal response to, E597
 vasopressin response, fetal (sheep), E464
 Hepatectomy, functional, protein degradation, skeletal muscle, E379
 Hepatic vein, cholinergic agonists, hyperglycemic effects of, E431
 Histamine, corticosterone effects, dextran shock, E569

Hormonal regulation, iodothyronine 5'-deiodinase, brown fat, E639
 Hormonal response, early hyperglycemia, after hemorrhage, E597
 Hormones: *see also* specific hormone
 altricial and precocial timing of birth, E78
 release, adenylate cyclase toxin effects, pituitary, E164
 β -Hydroxybutyrate, ketone body kinetics, determination by dual-isotope technique, E185
 Hypercalcemia, serum calcium effects, parathyroid hormone, E680
 Hyperglycemia
 after hemorrhage, hormonal response to, E597
 gestational, insulin secretion and, fetal pancreas, E86
 Hyperinsulinemia
 metabolic substrate uptake, fetus (sheep), E349
 phosphorylation of insulin receptor, diabetes, E542
 Hyperoxia, exercise, glucose turnover during, E209
 Hypertension, stroke-prone, renin heterogeneity in, E367
 Hyperthyroidism, nuclear triiodothyronine receptors, brown fat, E503
 Hypocalcemia, serum calcium effects, parathyroid hormone, E680
 Hypoglycemia
 chronic, glucose transport and, brain, E442
 epinephrine and, during exercise, E104
 Hypophysectomy, TRH effects, thyrotroph function, E563
 Hypothalamus, lesions, glutamate treatment, E407
 Hypothyroidism, nuclear triiodothyronine receptors, brown fat, E503
 Hypoxia
 blood flow, nerve edema and, E92
 exercise, glucose turnover during, E209

I

IGF: *see* Insulinlike growth factor
 Immunoreactivity, galaninlike, pancreatic neuropeptide, E127
 Indomethacin, kinin-generating activity and, ovarian, E362
 Infant: *see* Neonate
 Insulin
 action
 blood flow effects, muscle, E422
 diet change effects, E616
 additive effects, glucose and AIB uptake, muscle, E21
 altricial and precocial timing of birth, E78
 binding, chronic exercise effects, muscles, E196
 binding and phosphorylation, basolateral membranes, renal, E32
 chronic hypoglycemia, glucose transport and, brain, E442
 dose-response relations, leucine kinetics and, E334
 early hyperglycemia, after hemorrhage, E597
 galanin effects, E127
 glycogen synthesis and, liver, E584
 growth and, fetal paws, E624
 hypoglycemia, epinephrine effects, exercise and, E104

Insulin (continued)

- infusion effects, fetus, glucose kinetics of mother and (sheep), E448
- insulinlike growth factor receptors and, muscle cells, E611
- iodothyronine 5'-deiodinase regulation, brown fat, E639
- kinetics, linearity of, E247
- maternal ethanol ingestion effects, E178
- metabolic substrate uptake and, fetus (sheep), E349
- plasma, zinc deficiency and, E273
- pulsatility, pancreas, E215
- pyruvate dehydrogenase and glycogen synthase, fat cells, E489
- release
 - islet blood flow, CNS effects, E644
 - proinsulin effects, E139
- resistance, fat feeding and, E576
- secretion
 - β -adrenergic contribution to, uremia, E322
 - carbon tetrachloride-induced liver injury, E660
 - hyperglycemia effects, fetal pancreas, E86
 - potentiation between ATP or ADP and acetylcholine, E416
- sensitivity
 - adipocytes, glucose tolerance effects, E306
 - glycogen depletion and, muscle, after exercise, E664
 - increased, during lactation, E537
 - stimulation, glucose uptake, somatostatin effects, E674
 - vesicle encapsulated, charge effects, liver, awake state, E591
- Insulinlike growth factors, binding, renal basolateral membranes, E32
- Interleukin 1, endotoxin treatment and, lipoprotein lipase-suppressing mediator, E470
- Iodothyronine 5'-deiodinase, hormonal regulation of, brown fat, E639
- Islets of Langerhans: see Pancreatic islets
- Isoelectric focusing, renin, hypertension, E367
- Isotope
 - stable
 - determination of ketone body kinetics, E185
 - tracers, newborn, E71

K

- Ketogenesis, fatty acid oxidation, hepatic, E241
- Ketoisocaproate, oxidation, insulin dose-response relations and, E334
- α -Ketoisocaproate
 - leucine and, glucose-sparing effects, E648
 - leucine oxidation, trioctanoin infusion effects, E343
- Ketone body, kinetics, dual-isotope technique for determination, E185
- Kidney
 - basolateral membrane, insulinlike growth factors in, E32
 - dietary recovery in, rRNA metabolism during, E266
 - epinephrine disposal, E285
 - renin release, calcium effects, E98
- Kidney glomerulus, angiotensin II receptor alterations, during pregnancy, E58

- Kinase, activity, insulin receptor, diabetes, E542
- Kinin, generating activity, ovarian, E362

L

- Lactate
 - glycogen synthesis and, liver, E584
 - insulin resistance and, obesity, muscle, E299
 - production, calcium transport and, skeletal muscle, E258
 - threshold, inspired oxygen breathing and, E209
 - turnover, calculation, model, E715
- Lactation: see also Fetus; Placenta; Pregnancy
 - bone changes in, E400
 - insulin sensitivity during, E537
 - protein antigens, transfer into milk, E227
- Lactogen, placental, growth hormone receptors and, liver (sheep), E328
- Leucine
 - α -ketoisocaproate and, glucose-sparing effects, E648
 - kinetics, insulin dose-response relations and, E334
 - oxidation, trioctanoin infusion effects, E343
 - transport, blood-brain barrier, E477
- Lipolysis
 - fasting, preoptic area and, E703
 - glucose tolerance, insulin sensitivity and, E306
- Lipoprotein lipase
 - exercise training and cold acclimation, adipose tissue, E251
 - serum, endotoxin treatment, E470
- Liposomes, targeted, charge effects, liver, E591
- Liver
 - carbon-tetrachloride-induced injury, insulin and glucagon secretion after, E660
 - cold exposed, alanine effects, malate-aspartate shuttle, E385
 - fatty acid oxidation, sulfonylureas effects on, E241
 - GH receptors, placental lactogen and (sheep), E328
 - glycogen synthesis, plasma glucose concentration effects, E584
 - increased concentration of carnitine, clofibrate and, E311
 - plasma membrane vesicles, glutamine transport, E509
 - purine biosynthesis, after bilateral adrenalectomy, E373
 - vesicle encapsulated insulin, charge effects, awake state, E591
 - zinc metabolism, coordinate regulation of, E688
- Luteinizing hormone, release, β -adrenergic agonist effects, orchidectomy and, E316

M

- Maple syrup urine disease, peptide transport and, blood-brain barrier, E477
- γ -Melanocyte-stimulating hormone, acute pressor effects of, central vasopressin system mediation, E134
- Membrane, plasma, insulin binding, chronic exercise effects, muscle, E196

- Menstrual cycle, energy deprivation effects, sex hormone patterns, E483
- Mesenchymal cells, uterine, separation from epithelial cells, E630
- Mesenteric arteries, angiotensin II receptor alterations, during pregnancy, E58
- Metabolic fluxes, calculation, model, E715
- Metabolic rate, insulin effects, fetus (sheep), E349
- Metallothionein, gene expression, zinc metabolism and, E688
- Methoxamine, plasma renin activity, awake state, E695
- Methoxyverapamil, calcium transport and, skeletal muscle, E258
- Milk, transfer of protein antigens into, during lactation, E227
- Mineralization, vitamin D, pregnancy and lactation, E400
- Mineralocorticoid, calcium absorption and, intestinal, E279

Models

- compartmental, calculation of metabolic fluxes, E715
- fetal insulin infusion, glucose kinetics of mother and (sheep), E448
- Monoclonal antibodies, to receptors, muscle cells, E611
- 5'-Monodeiodinase, tissue activity, thyroidectomy and, newborn (lamb), E151
- Monosodium glutamate, thermogenesis and, brown fat, E407

- γ -MSH: see γ -Melanocyte-stimulating hormone

Muscle

- fat feeding, insulin resistance and, E576
- glucose and AIB uptake, exercise and insulin effects, E21
- glycogen depletion, insulin sensitivity and, after exercise, E664
- insulin action
 - blood flow effects, E422
 - diet change effects, E616
- insulin binding, chronic exercise effects, E196
- insulin resistance, exercise effects, obesity, E299
- metabolites, maximal exercise and, leg, E65
- Muscle, skeletal
 - calcium transport, thyroid hormone effects, E258
 - diabetic, calcium pump activity of sarcoplasmic reticulum, E515
 - oxygen consumption, after exercise, E294
 - protein degradation, feeding and fasting effects, E379
- Muscle, smooth, PHI and VIP in, uterus, E48
- Muscular dystrophy, thyroxine in, brown fat, E8
- Myoblasts, insulinlike growth factor receptors on, E611
- Myopathy, brown fat, thyroxine in, E8
- Myotubes, insulinlike growth factor receptors on, E611

N

- Natriuretic factor, atrial, vasopressin and, dehydration and rehydration, E497
- Neonate: see also Newborn
 - glucose balance, maternal ethanol ingestion effects, E178

- Neostigmine, hyperglycemic effects, central, fasting and, E431
 Nerve: *see specific nerve*
 Neural control, catecholamines, after brain stem stimulation, E14
 Neuropeptides
 pancreatic, E127
 regulatory, uterine smooth muscle, E48
 vertebrate and invertebrate tissues, E707
 Neurophysin, modulation of release, vasopressin, E556
 Newborn: *see also Neonate*
 glucose carbon recycling and oxidation, E71
 thyroidectomy, thyroid hormone metabolism (lamb), E151
 Nitrogen-15, glutamine and glutamate kinetics, E117
 Norepinephrine
 disposal, splanchnic and renal contributions to, E285
 glucoregulation and, exercise, E104
 Nutrition: *see Feeding*

O

- Obesity
 fat feeding and, E576
 glutamate treatment and, brown fat, E407
 glycogen synthase and pyruvate dehydrogenase, fat cells, E489
 insulin resistance, exercise and diet effects, muscle, E299
 Orchidectomy, luteinizing hormone release, β -adrenergic agonist effects, E316
 Ovary, kinin-generating activity, E362
 Ovulation, kinin-generating activity, E362
 Oxidation, glucose carbon, newborn, E71
 Oxidative metabolism, substrates, hindlimb, pregnancy and, awake state, E42
 Oxygen, consumption, after exercise, skeletal muscle, E294
 Oxytocin, neuron activity, vasopressin modulation of, E556

P

- Pancreas
 insulin secretion
 acetylcholine and, E416
 hyperglycemia effects, fetus, E86
 perfusion, insulin and glucagon secretion, liver injury and, E660
 Pancreatic islets
 blood flow: *see Blood flow*
 galanin, E127
 peptides, pulsatility of, E215
 Parasympathetic nervous system, halothane effects, pancreatic F-cell, E111
 Parathyroid hormone
 action, visceral yolk sac, E27
 bone changes, pregnancy and lactation, E400
 calcium absorption and, intestinal, E279
 serum calcium effects, E680
 Peptide histidine isoleucine amide: *see PHI*
 Peptides: *see also Polypeptides*
 cardiac-derived, dehydration and rehydration, E497
 cholecystokinin precursor-related, vertebrate and invertebrate tissue, E707
 pancreatic islets, pulsatility of, E215
 regulatory, uterine smooth muscle, E48
 transport, blood-brain barrier, E477

- Phenoxybenzamine, plasma renin activity, awake state, E695
 Phenylephrine
 luteinizing hormone release and, orchidectomy, E316
 plasma renin activity, awake state, E695
 PHI, VIP comparison, uterine smooth muscle, E48
 Phosphocreatine, glucose uptake, maximal exercise and, leg, E65
 5-Phosphoribosyl-1-pyrophosphate, content, adrenalectomized liver, E373
 Phosphorus, serum, skeletal mineralization and, vitamin D deficiency, E234
 Pituitary cells, anterior, stimulation by prokaryotic adenylate cyclase toxin, E164
 Pituitary gland, transplants, secretion, thyrotropin-releasing hormone effects, E563
 Placenta: *see also Fetus; Lactation; Pregnancy*
 insulin infusion, glucose kinetics of mother and (sheep), E448
 lactogen, GH receptors and, liver (sheep), E328
 Polypeptides: *see also Peptides*
 pancreatic
 halothane effects, E111
 pulsatility of, E215
 vasoactive intestinal, PHI comparison, uterine smooth muscle, E48
 Pregnancy: *see also Fetus; Lactation; Placenta*
 angiotensin II receptor alterations during, E58
 bone changes in, E400
 protein kinase C, decidual prolactin and, E172
 substrate balance, hindlimb, awake state, E42
 Preoptic area, FFA mobilization and, E703
 Preprocholecystokinin, vertebrate and invertebrate tissues, E707
 Progesterone, estrogen-synthesis synthesis, cholesterol metabolism and, corpus luteum, E457
 Proinsulin, inhibition of C-peptide output, splanchnic, E139
 Prolactin, decidual, protein kinase C and, placenta, E172
 Propranolol
 glucagon action and, uremia, E322
 plasma renin activity, awake state, E695
 Propylthiouracil, stimulation of mRNA, submandibular gland, E290
 Prostaglandins
 calcium effects, renal, E98
 kinin-generating activity and, ovarian, E362
 Protein
 degradation, skeletal muscle, E379
 depletion, rRNA metabolism, kidney, E266
 low, thermogenic response to, aging and, E438
 plasma, blood-brain barrier transport, E204
 uncoupling, myopathic brown fat, E8
 Protein antigens, transfer into milk, during lactation, E227
 Protein kinase, insulinlike growth factor binding and, renal basolateral membranes, E32
 Protein kinase C, activation, decidual prolactin release and, placenta, E172

- Pump, calcium, activity, sarcoplasmic reticulum, diabetic skeletal muscle, E515
 Purine, biosynthesis, after bilateral adrenalectomy, liver, E373
 Pyruvate dehydrogenase, adipocytes, obesity and diabetes, E489

R

- Radioimmunoassay, calibration, variance weighting functions, E357
 Receptors
 angiotensin II, alterations, pregnancy and, E58
 glucoreceptors, insulin-sensitive, preoptic area, E703
 growth hormone, placental lactogen and (sheep), E328
 insulin, phosphorylation, diabetes, E542
 insulinlike growth factor, muscle cells, E611
 thyroid hormone, brown fat, E503
 triiodothyronine, nuclear, brown fat, E503
 Rehydration, dehydration and, atrial natriuretic factor and vasopressin effects, E497
 Renin
 heterogeneity, stroke-prone hypertension, E367
 plasma activity, α -adrenergic stimulation, E695
 release, calcium effects on, renal, E98
 Respiration, inspired oxygen breathing, exercise, glucose turnover in, E209
 Respiratory quotient, energy metabolism, enteral nutrition and, E524
 Retina, tyrosine uptake, amino acid effects, E393
 Rhythm, circadian, glutamate treatment and, brown fat, E407
 Ribonucleic acid
 messenger, stimulation by thyroid hormone, submandibular gland, E290
 ribosomal, metabolism during dietary recovery, kidney, E266
 Ribosomes, formation, dietary recovery and, kidney, E266
 RNA: *see Ribonucleic acid*

S

- Salmefamol, luteinizing hormone release and, orchidectomy, E316
 Sarcoplasmic reticulum, calcium pump activity, diabetic skeletal muscle, E515
 Sex hormone, energy deprivation effects, menstruating women, E483
 Shock, dextran-induced, corticosterone effects, E569
 Silicon, uptake and distribution, E670
 Sodium, glutamine transport and, liver plasma membrane vesicles, E509
 Sodium chloride, oxytocin release, modulation by vasopressin, E556
 Soleus muscle
 calcium transport, thyroid hormone effects, E258
 glucose and AIB uptake, exercise and insulin effects, E21
 insulin action, diet change effects, E616
 insulin sensitivity, exercise and, E664
 Somatostatin
 galanin effects, E127
 hyperglycemic effects, central, fasting and, E431

- Somatostatin (continued)
 pancreatic, pulsatility of, E215
 potentiation, insulin-stimulated glucose uptake, E674
 Starvation: *see* Fasting
 Steroid hormones, cholesterol metabolism and, corpus luteum, E457
 Steroidogenesis, cholesterol metabolism and, corpus luteum, E457
 Submandibular gland, thyroid hormone, stimulation of renin mRNA, E290
 Substrates
 metabolic, uptake, insulin effects, fetus (sheep), E349
 net balance, hindlimb, pregnancy and, awake state, E42
 Sulfonylureas, fatty acid oxidation and, liver, E241
 Sympathetic nervous system
 galanin, E127
 preoptic area, FFA mobilization and, E703
 Sympathochromaffin system, epinephrine effects on hypoglycemia, exercise, E104

T

- Temperature, environmental, responses to, brown adipose tissue mitochondria, E192
 Theophylline, insulin secretion, hyperglycemic pancreas, fetus, E86
 Thermogenesis
 diet-induced
 enteral nutrition and, E524
 low protein and, aging, E438
 nuclear triiodothyronine receptors, E503
 fat feeding, insulin resistance and, E576
 GDP binding sites, brown fat mitochondria, E192
 glutamate treatment and, brown fat, E407
 hormonal regulation, iodothyronine 5'-deiodinase, brown fat, E639
 thyroidectomy, newborn (lamb), E151
 thyroid hormone, brown fat, E1, E8
 Thyroidectomy, thyroid hormone metabolism and, newborn (lamb), E151
 Thyroid gland, thyroid hormone metabolism, newborn (lamb), E151
 Thyroid hormone
 calcium transport and, skeletal muscle, E258

- clofibrate and, concentration of carnitine and, liver, E311
 diet and cold effects, brown fat, E1
 metabolism, thyroidectomy and, newborn (lamb), E151
 myopathy and, brown fat, E8
 receptors: *see* Receptors
 stimulation of renin mRNA, submandibular gland, E290
 transport, caloric deprivation, E156
 Thyrotroph, immunochemistry, TRH effects, pituitary transplants, E563
 Thyrotropin-releasing hormone, secretion and, pituitary transplants, E563
 Thyroxine
 diet and cold effects, brown fat, E1
 hormonal regulation, brown fat, E639
 myopathy and, brown fat, E8
 stimulation of mRNA, submandibular gland, E290
 transport, caloric deprivation and, E156
 Tissue: *see also* specific type
 separation, method, E630
 silicon distribution, E670
 vertebrate and invertebrate, cholecystokinin precursor-related peptides in, E707
 Tolbutamide, fatty acid oxidation and, liver, E241
 Torpor, glutamate treatment and, brown fat, E407
 Tracer, isotropic, calculation of metabolic fluxes, E715
 TRH: *see* Thyrotropin-releasing hormone
 Trictanoin, infusion, leucine oxidation, E343
 Triglyceride, synthesis, fatty acid oxidation and, liver, E241
 Triiodothyronine
 altricial and precocial timing of birth, E78
 hormonal regulation, brown fat, E639
 low, caloric deprivation and, E156
 metabolism, thyroidectomy and, newborn (lamb), E151
 receptors: *see* Receptors
 stimulation of mRNA, submandibular gland, E290
 3,5,3'-Triiodothyronine
 diet and cold effects, brown fat, E1
 myopathy and, brown fat, E8
 Trimethyllysine, clofibrate and, concentration of carnitine and, liver, E311
 N-Tyr-MIF-1, carrier-mediated transport, blood-brain barrier, E477

- Tyrosine, competitive uptake, retina, E393

U

- Uremia, glucagon action, β -blockade and, E322
 Urine, arginine vasopressin, fetal hemorrhage and (sheep), E464
 Uterus, cells, separation method, E630

V

- Vagal nerve, stimulation, halothane and, E111
 Vasopressin
 angiotensin II stimulation of ACTH secretion and, awake state, E52
 arginine
 continuous hemorrhage effects, fetus (sheep), E464
 oxytocin neuron activity and, E556
 atrial natriuretic factor and, dehydration and rehydration, E497
 central system mediation, acute pressor effects of γ -MSH, E134
 release, central cholinergic control of, awake state, E146
 VIP: *see* Polypeptides, vasoactive intestinal
 Vi:amin D
 bone changes and, pregnancy and lactation, E400
 deficiency, skeletal mineralization, serum calcium and phosphorus effects, E234

W

- Water
 deprivation
 cardiac-derived peptides and, E497
 vasopressin role in ACTH secretion, awake state, E52
 Weight, body, loss, sex hormone patterns and, menstruating women, E483

Y

- Yolk sac, visceral, parathyroid hormone action, E27

Z

- Zinc
 deficiency, glucose intolerance and, E273
 metabolism, coordinate regulation of, E688
